Supplementary information

VPAC1 y VPAC2 expresión on trophoblast-derived cell lines

Supplementary material. Fig. S1 cDNA from SWAN 71 and HTR8 cell lines were subjected to qRT-PCR to confirm VPAC1 (a) and VPAC2 (b) expression as described in ²²; (n=3).

Plasmid transfection and VPAC2 over-expression controls

Supplementary material. Fig. S2 a) Cells were co-transfected with a VPAC2 and a GFP plasmid to evaluate the transfection efficiency. 36 h post-transfection images were taken and analyzed

using the image J program. A representative image is shown. b) VPAC2 over-expression was confirmed by qRT-PCR (**** $P < 0.0001$; $n=4$).
